PROFESSIONAL EXPERIENCE

Senior Project Engineer – DevOps & Cloud | Wipro Limited| Greater Noida, India | Feb 2021 – Present

- Own resolution of escalated tickets and production incidents across multi-environment AWS and Terraform-managed infrastructure through 24×7 on-call operations, adhering to SLAs and quality norms and maintaining 99.9% uptime for an e-commerce client.
- Perform root cause analysis on incidents and recurring issues, review monitoring and incident trends, and drive corrective and preventive actions aligned with SRE practices.
- Design, operate, and troubleshoot AWS PaaS workloads across EC2, ECS, EKS, RDS, Lambda, VPC, IAM, Route 53, Auto Scaling, and CloudWatch, supporting high-availability applications.
- Design and maintain Infrastructure as Code with Terraform across AWS, Azure, and GCP, reducing manual provisioning effort by 60%+ and minimizing configuration drift.
- Review infrastructure change and deployment plans (Terraform plans and pipeline changes) before release to reduce human-error risk and improve release consistency.
- Implemented Prometheus, Grafana, Datadog, and CloudWatch monitoring with centralized logging and proactive alerting, reducing MTTR by more than 30%.
- Drove cloud cost and capacity optimization through tagging, budget alerts, AWS Compute Optimizer recommendations, and right-sizing, reducing cloud spend by 15–25% across key workloads.
- Built and maintained CI/CD pipelines (Jenkins, GitHub Actions, GitFlow) for containerized microservices on AWS EKS, EC2, and ECS, reducing deployment time by 40–50%.
- Implemented AWS security controls including IAM policies, RBAC, encryption at rest/in transit, vulnerability scanning, Security Groups, NACLs, CloudTrail, and Security Hub.
- Mentored junior engineers on IaC, CI/CD, and troubleshooting practices; created and maintained technical documentation and runbooks to support team knowledge sharing.
- Collaborated with application teams and client stakeholders to communicate incident status, findings, and resolution plans.
- Supported Azure migration and landing-zone activities (VNet design, hub-spoke networking, NSGs, AKS, ACR, Key Vault) and containerized and deployed a GenAI application on Amazon ECS through CI/CD.

Summer Intern – IoT Engineering | IIT Patna | Patna, India | Jun 2020 – Aug 2020

- Designed and implemented an IoT-based distance-measuring device integrating sensors, microcontrollers, and cloud data transmission for real-time monitoring.

SELECTED PROJECTS

Multi-Cloud Infrastructure Automation | Terraform, AWS, Azure, GCP, Bash, Helm

- Built reusable Terraform modules for VPC/VNet, EKS/AKS clusters, and RDS, reducing provisioning time from days to under 30 minutes; applied IAM/RBAC controls and cost-control tagging.
- Deployed Helm-based microservices and configured Istio service mesh for traffic management and observability.

Observability Stack Implementation | Prometheus, Grafana, ELK, Datadog, EKS

- Designed metrics, dashboards, log aggregation, and alerting for EKS microservices, enabling proactive incident response and reducing MTTR by more than 30%.
